

# Our Most Precious Cargo

"I have absolute confidence in the MU-2 when flying for business, pleasure or when flying the people I love. I have a choice to fly any type of aircraft but have decided to fly the MU-2 for the last 20 years because of its speed and reliability in tough conditions. This is a wonderful plane when it is properly maintained and pilots are properly trained."  
- Bob Watkins, Owner Operator

Every member of the Watkins family has flown safely in the MU-2.
